

Authenticator app for OVERS-Certify a Record

Using an Authenticator App to Certify a Record

1. Locate the record in OVERS that needs to be certified.
2. Click on the Certify link on the left menu under Medical Certification.

3. Select Authenticator from the drop-down menu button. This button displays your certifying options. These options may be different for each user.

4. Open the authenticator app that you installed on your phone.

5. Make sure that the certify boxes are checked. Enter the code that appears in the authenticator app with no spaces and then click Verify Code.

Affirmations

Affirm the following:

- I certify that to the best of my knowledge traumatic injury or poisoning DID NOT play any part in causing death, that death did not occur in any unusual manner and was due entirely to NATURAL CAUSES.
- I certify that death occurred at the time, date and place indicated.

Enter the verification code from your Authenticator App.

Code:

Verify Code

Affirm **Clear** **Authenticator** **Return**

6. The next screen will show that the code has been Authenticated. Click Affirm to finish.
