

# PACIFIC PATHOLOGY ASSOCIATES

A Sonic Healthcare Anatomic Pathology Practice

January 2023

Dear Valued Client,

On November 1st, 2021, Aurora Diagnostics and its pathology practices started transitioning to its new brand identity as the Anatomic Pathology Division of Sonic Healthcare USA.

## PACIFIC PATHOLOGY ASSOCIATES

A Sonic Healthcare Anatomic Pathology Practice

We are led by premier pathologists, united under the shared objectives of Medical Leadership, working in a network of clinical laboratories and pathology practices across the United States. Sonic Healthcare has a global team of more than 1,000 pathologists who strengthen and enrich our global healthcare offering with nearly 400 pathologists located in the United States, providing personalized, accessible, quality pathology and laboratory testing services to patients and our physician partners.

What does this mean for you? We will continue to operate as customary, maintaining our local name, goodwill, and specialized pathology team, while providing comprehensive pathology services to patients, clinicians, and the community.

We might have a new look, but you will have the same incredible team servicing your pathology needs. Our focus has always been to remain responsive to the needs of our local clients and patients by providing quality pathology services.

For additional information, please contact your representative directly.

We are very excited about our path forward under Sonic Healthcare USA. Together, we are bringing our personalized pathology services closer to you than ever before to better serve your patients.

Sincerely,

Matthew Raines, MD  
Managing Director  
Pacific Pathology Associates
