

Does Salem Health accept my insurance plan?

Salem Health Hospitals & Clinics accept most insurance plans, however it is important for you to contact your insurance carrier to verify the specific service or provider is covered; they are subject to change. Services provided at the hospital (such as lab, imaging or an inpatient stay) may be billed separately from services provided by a physician. Independent providers not employed by Salem Health Medical Group may accept different insurance plans than doctors working at our Salem Health Medical Clinics.
